From: Sandra Glagola

I am writing you to express my many concerns about irradiated food. As a consumer I feel it's my right to be able to identify an irradiated product. All irradiated foods need to carry a prominent disclosure, in easy-to-read type & on the front of the package.

I am also deeply worried about the excessive use of antibiotics in animal feed. You'll see that I strongly support the petition filed by the CSPI.
Thank you Sandra Glagola
